# MOTIVATION

## TECHNOLOGY

Gaming studios have developed advanced screen capture functionality and gallery modes that allow the gamer to screenshot ***in game*** moments.

## NEW MARKET

Features have evolved to the point where gamers are a burgeoning content creation market.

## NEW ART FORM

Gamers can push the limits of the game's intended use to create art and save their in game achievements.

## NEED FOR INGAME

Graphics nowadays are so finely tuned that its impossible to discern fiction from reality. As the market for this content grows, there will need to be a place where you store, refine and share your content.

# PROBLEMS

## CONTENT

Content is easy to create, but hard to track, store, and interface with in a user friendly way.

## STORAGE

Content is stored locally on hardware, but is not easily accessible when you are offline.

## MARKET

Services exist to help maintain your content, but the use of these cloud services require subscriptions.

## PLATFORMS

There is not easy way to share cross platform and platform specific tools don't offer persistent storage

# INGAME SOLUTIONS

## CONTENT

Allow users to create a free personalized online albums to share gaming content.

## STORAGE

Offers InGamers persistent storage for the content that they create within their favorite games.

## MARKET

Help our users connect with the broader gaming community.

## NETWORK

Create a social network where users can interact with public content that other InGamers produce.
